

## Emoneko Protect-UV+

An advanced coating process that eliminates glare while allowing the most light transmission through lenses for clearest vision. It features multiple layers, each with its own unique capability, including water-repellency, anti-static, scratch resistance and anti-smudging, to ensure you see as clearly as possible.

# Emoneko Protect-UV+

## Crystal-clear and sharp vision

The coating ensures you are prepared for whatever life may throw at your eyes.

## Overview of Characteristics
